

HUDUMALINK

Digital Service Provider Platform

Connecting Clients with Trusted Service Providers

PROJECT PROPOSAL

Date: November 15, 2025
Version: 1.0

Prepared by:
Alvons Chepkeitany
Senior Software Engineer

EXECUTIVE SUMMARY

HUDUMALINK is a comprehensive digital platform designed to revolutionize the service provider marketplace in Kenya and beyond. The platform addresses a critical gap in the market by creating a trusted, scalable ecosystem that connects clients with verified service providers across various categories including home services, personal care, professional services, and skilled trades.

In todays fast-paced digital economy, consumers struggle to find reliable service providers, while skilled professionals lack effective platforms to showcase their expertise and grow their customer base. HUDUMALINK solves these challenges by providing a single, trusted platform where quality service delivery meets convenience and transparency.

This proposal outlines the technical architecture, implementation strategy, resource requirements, and financial projections for developing and launching HUDUMALINK. The platform is designed to be scalable, secure, and user-friendly, with a focus on mobile-first accessibility and real-time service delivery tracking.

Key Highlights:

Aspect	Details
Target Market	Kenya and East Africa
Platform Type	Web & Mobile Application (iOS & Android)
Revenue Model	Commission-based + Premium subscriptions
Development Timeline	6-9 months for MVP
Initial Investment	\$150,000 - \$250,000
Expected ROI	Break-even in 18-24 months

PROJECT OBJECTIVES

Main Objective

To create a scalable digital platform that connects clients with trusted service providers, ensuring convenient, reliable access to services while helping providers grow their skills, credibility, and customer reach.

Sub-Objectives

1. Single Trusted Platform

Provide one reliable place where clients can easily discover, book, and pay for verified service providers. The platform will implement robust verification processes, including background checks, skill assessments, and customer reviews to ensure quality and trust.

2. Digital Access to Services

Enable users to book, track, and pay for home and personal services online for greater efficiency. The platform will feature real-time booking, GPS tracking of service providers, digital payment integration, and automated scheduling to streamline the entire service delivery process.

3. Save Time and Increase Convenience

Reduce effort for clients by simplifying service search, booking, and communication. Advanced search filters, instant matching algorithms, and in-app communication tools will enable clients to find and hire service providers within minutes rather than hours or days.

4. Promote Entrepreneurship

Support service providers in showcasing their skills, gaining customers, and building sustainable income. The platform will provide tools for portfolio building, customer relationship management, earnings tracking, and professional development through training resources and certification programs.

TECHNICAL ARCHITECTURE

HUDUMALINK will be built using a modern, scalable microservices architecture that ensures high availability, performance, and maintainability. The system is designed with security, scalability, and user experience as primary considerations.

System Architecture Overview

Technology Stack

Layer	Technologies	Purpose
Frontend Web	React.js, Next.js, TypeScript, Tailwind CSS	Responsive web application with SSR
Mobile Apps	React Native, Flutter	Cross-platform iOS & Android apps
Backend	Node.js, Express.js, Python (Django/FastAPI)	RESTful APIs and business logic
Database	PostgreSQL (primary), MongoDB (analytics), Redis (cache)	Data persistence and caching
Real-time	Socket.io, Firebase Real-time DB	Live updates and notifications
Payment	M-Pesa, PayPal, Stripe	Multiple payment gateways

Cloud/DevOps	AWS/GCP, Docker, Kubernetes, CI/CD	Scalable infrastructure
Monitoring	New Relic, Sentry, CloudWatch	Performance and error tracking

FEATURES & FUNCTIONALITY

HUDUMALINK will offer a comprehensive suite of features designed to provide exceptional user experience for both clients and service providers.

For Clients

Feature	Description
Service Discovery	Advanced search with filters by category, location, price, ratings, and availability
Provider Profiles	Detailed profiles with photos, skills, certifications, reviews, and work portfolio
Real-time Booking	Instant booking with calendar integration and automated confirmation
Secure Payments	Multiple payment options including M-Pesa, cards, and digital wallets
Live Tracking	GPS tracking of service provider en route to appointment
In-app Chat	Direct messaging with service providers for clarifications
Service History	Complete record of past bookings and transactions
Ratings & Reviews	Leave detailed feedback and view provider reputation

IMPLEMENTATION PLAN

The HUDUMALINK platform will be developed in multiple phases using an Agile methodology, allowing for iterative development, continuous feedback, and flexibility to adapt to market needs.

Phase	Duration	Key Deliverables
Phase 1: Planning & Design	4 weeks	Requirements analysis, UI/UX design, technical architecture, data strategy
Phase 2: MVP Development	12 weeks	Core booking system, user authentication, basic payment integration
Phase 3: Testing & QA	4 weeks	Comprehensive testing, bug fixes, security audits, performance optimization
Phase 4: Beta Launch	4 weeks	Limited release, user feedback collection, iterations based on feedback
Phase 5: Full Launch	2 weeks	Marketing campaign, full platform release, customer support setup

BUDGET & FINANCIAL PROJECTIONS

This section provides a detailed breakdown of the estimated costs for developing and launching the HUDUMALINK platform, along with projected revenue streams and break-even analysis.

Development Costs (MVP)

Category	Details	Cost (USD)
Personnel Costs	Development team salaries (6 months)	\$120,000
Infrastructure	Cloud hosting, domains, SSL certificates	\$8,000
Third-party Services	Payment gateways, SMS, email services	\$5,000
Design & Branding	Logo, UI/UX design, marketing materials	\$12,000
Legal & Compliance	Business registration, terms of service, privacy policy	\$8,000
Testing & QA	Testing tools, security audits	\$6,000
Marketing & Launch	Initial marketing campaign, PR	\$25,000
Contingency (15%)	Buffer for unexpected expenses	\$27,600
TOTAL		\$211,600

Revenue Model

Revenue Stream	Description	Rate/Fee
Service Commission	Commission on each completed booking	15-20% of service fee
Provider Subscriptions	Premium features for service providers	\$20-50/month
Featured Listings	Enhanced visibility in search results	\$30-100/month
Advertising	Promoted services and banner ads	Variable

CONCLUSION & NEXT STEPS

HUDUMALINK represents a significant opportunity to transform the service provider marketplace in Kenya and East Africa. By leveraging modern technology, user-centric design, and a robust business model, the platform is positioned to become the go-to solution for connecting clients with trusted service providers.

The platform addresses real pain points in the market: clients struggle to find reliable service providers, while skilled professionals lack effective channels to reach customers. HUDUMALINK bridges this gap with a comprehensive digital solution that benefits all stakeholders.

With a solid technical architecture, clear implementation roadmap, and sustainable revenue model, HUDUMALINK is well-positioned for success. The phased development approach minimizes risk while allowing for rapid iteration based on user feedback.

Immediate Next Steps

1. Secure initial funding and finalize budget allocation
2. Assemble core development team and assign roles
3. Begin detailed requirements gathering and user research
4. Create detailed UI/UX wireframes and prototypes
5. Set up development infrastructure and tools
6. Establish partnerships with payment providers
7. Begin MVP development following Agile methodology
